

JR-1700

Acryl Resin for electronic products

JR-1700 is acrylic copolymer with epoxy group. It's properties after cured are excellent for mechanical strength, adhesive strength and chemical resistance. JR-1700 has broad application in surface coatings. It is recommended for industrial coating, top coating, electro-conductive ink, construction and civil work application.

■ Application

- Conductive silver paste (for through hole PCB)
- Laminating, PCB, F/W, composite
- Industrial paints for anticorrosive
- General coating
- Adhesives

■ Specification

| ITEM | RESULT | REMARK |
|------------------|--------------------|--------|
| Appearance | Transparent liquid | - |
| Viscosity | 80-150(20℃) | mPa.s |
| Refractive Index | 1.440 | ±0.005 |
| EEQ | 190 | ±20 |
| N. V. | 25 | wt% |
| Solvent | BCA | wt% |

■ Packing

Steel drum of 195kg net weight.
