

## JR-3000

### Flexible Resin for electronic products

JR-3000 is bisphenol A type polymer with flexible linkage group. It's properties after cured are excellent for mechanical strength, adhesive strength and chemical resistance. JR-3000 has broad application in surface coatings. It is recommended for industrial coating, top coating, electro-conductive ink, construction and civil work application.

#### ■ Application

- Conductive silver paste (for through hole PCB)
- Laminating, PCB, F/W, composite
- Industrial paints for anticorrosive
- General coating
- Adhesives

#### ■ Specification

ITEM	RESULT	REMARK
Appearance	Brownish transparent liquid	-
Viscosity	4,000(20℃)	mPa.s
Refractive Index	1.510	±0.005
Acid value	1.04	±20
N. V.	70	wt%
Solvent	DPM	30wt%

#### ■ Packing

Steel drum of 195kg net weight.
